

# THE CARES APPROACH:

Improving Glycemic, Cardiovascular, and Renal Outcomes

## WELCOME TO AUGMENTED REALITY... a tour in the palm of your hand!

This tool can be used for peer-to-peer, physician-to-patient, and physician-to-caregiver discussions. This tool will allow you to open up a pop-up, hands-on virtual world right in front of you. The tool displays the newer generation basal insulins and guides you through descriptions, animations, and explanations regarding their mechanism of actions. The images and animations that are brought to reality can be manipulated and controlled by YOU. It allows you to focus on specific areas and be truly engaged in the learning tool.

To use this augmented reality card, please download the **“Diabetes MOA Augmented Reality”** app from the Apple App Store or Google Play Store on your phone or tablet.

*This activity is provided by Med Learning Group.*

*This activity is co-provided by Ultimate Medical Academy/Complete Conference Management (CCM) and AMEDCO.*

*This activity is supported by educational grants from Lilly, Boehringer Ingelheim Pharmaceuticals and Lilly, and Merck & Co., Inc.*

Open the **DIABETES MOA AUGMENTED REALITY** app and point it at the image below.
