COVID-19 FRONTLINE THERAPIES:
## Navigating Through This Health Crisis and Optimizing Patient Care

BUILD A COVID PATIENT EDUCATION WEBSITE!

The COVID Frontline Patient Resource Portal

for physicians provides important content in a webpage format that can be customized with a professional headshot, biography, and practice specifics to be shared with patients. The content includes expert reviewed information about COVID-19, interviews of people treated with monoclonal antibody therapy, educational videos, downloadable patient guides, the COVID-19 Monoclonal Antibody Eligibility Tool for Patients, and links to resources and information regarding COVID-19 early treatment options. The patient portal also encourages prospective patients to contact the participating HCP for questions, appointments, and screenings.
